

# **PRESAGIA** Enterprise

## **Software for integrated absence and disability management**

Presagia Enterprise is a web-based absence and disability management solution that employers and service providers can use to integrate and manage employee **Leave, Accommodation** and **Occupational Health**. Presagia's absence and disability management solution enables customers to integrate and optimize their programs, enhance compliance with state and federal regulations, assert tighter management controls to address direct and indirect costs of absence, and analyze complete data to identify trends, risks and outcomes.

Presagia Enterprise customers are better able to:

- Centralize workforce absence and disability management within a web-based system
- Integrate case management for:
  - Employee Leave
  - Accommodation (ADA)
  - Return to Work
  - Occupational Health
  - STD, LTD, Workers' Compensation
  - Ergonomics
- Facilitate real-time communication
- Implement efficient processes based on best-practices
- Optimize processes with workflow automation
- Support compliance with regulations like FMLA, state leave laws, ADA and HIPAA
- Improve decision-making with online decision support resources
- Leverage document generation to auto-populate forms and letter templates
- Analyze trends, risks, outcomes and cost drivers via reporting and dashboard metrics

As well, Presagia Enterprise is a modular solution, consisting of the Presagia Leave, Presagia Accommodation and Presagia Occ Health modules. These modules can stand alone or be implemented together, and are described in detail in additional solution sheets available.
